ADAPTATION TO LH - CORRECTIVE COLOURING

During this seminar hairdressers learn the importance of consultation and what questions to ask their clients. Your educator will run through a quick guide of our LH colour families, what makes Couture Silk unique, in depth information on colour correction and which LH product options are best for the client or application.

Educators will then go through a step by step process on case studies, going lighter or going darker to which the hairdressers can then deliver their own practical session. Hairdressers can gain the most effectiveness from these colours and colour enhancers.
